

SUJITH VATHSAA RAMESH

Performance Data Analyst (AI & Data)

✉ suujithramesh@gmail.com ☎ +44-7442601632 🌐 Suujith Vathsaa

Profile

Data & Systems Analyst specialising in UK transport infrastructure analytics and digital transformation. Experienced in building scalable data solutions using Microsoft Fabric, Databricks, Oracle SQL, and Power BI to support complex operational environments. Currently contributing to AI-enabled ERP implementation through simulation modelling and performance optimisation. Skilled in translating complex data into clear, executive-ready insights that drive strategic decision-making.

PROFESSIONAL EXPERIENCE

Performance Data Analyst (AI & Data) 11/2024 – Present
Amey Plc.

- **AI-Driven ERP Implementation:** Support the rollout of **AI-enabled** ERP and scheduling platform (IFS WISE), conducting schedule simulations and scenario modelling to optimize roadworks planning, gang allocation, and asset delivery efficiency.
- **Simulation & Operational Modelling:** Run performance simulations to assess resource utilizations, delivery timelines, and infrastructure productivity, enabling **data-driven** operational decision-making.
- **Enterprise Data Engineering:** Design and maintain scalable data pipelines integrating Azure Data Lake, Azure Databricks, Microsoft Fabric (**Gen2 Dataflows**, Data Warehouse), Oracle **SQL** systems, and **REST APIs**.
- **Cloud Data Integration:** Extract, transform, and model (**ETL**) high-volume operational datasets from Oracle-based asset management systems and cloud storage environments to create analytics-ready data models.
- **Executive Performance Reporting:** Develop automated **Power BI** dashboards and monthly performance packs tracking **KPIs**, including utilizations, asset renewal efficiency, compliance metrics, and cost indicators.
- **Data Storytelling & Insight Communication:** Translate complex transport infrastructure data into structured, decision-ready narratives for senior leadership, regulators, and programme stakeholders.
- **Stakeholder Management:** Collaborate with transport managers, engineers, programme leads, and commercial teams to gather requirements and deliver tailored analytical solutions across multiple workstreams.
- **Workflow Automation & API Integration:** Build automated data workflows using **Power Automate** and REST API integrations to improve reporting accuracy and reduce manual intervention.
- **Operational Gap Analysis:** Identify inefficiencies across fleet utilization, downtime, fuel consumption, and infrastructure delivery outputs, informing cost optimization and **performance improvement initiatives**.
- **Data Governance & Compliance:** Implement validation controls, reconciliation processes, and GDPR-aligned data management practices to strengthen audit readiness and data integrity.
- **Digital Transformation Leadership:** Influence system evolution by identifying infrastructure capability gaps and supporting migration toward AI-enabled decision support frameworks.
- **Senior-Level Presentation:** Present analytical insights confidently to executive stakeholders, simplifying complex technical findings into clear, commercially and operationally relevant recommendations.

Inventory Specialist 01/2023 – 04/2024
RGIS

- Conducted periodic audits and compliance checks across leading retail brands, including Sainsbury's, Apple, and Ted Baker, ensuring operational standards were consistently met and inventory data remained accurate.
- Built and supported positive client relationships in fast-paced retail settings, enhancing the customer experience and contributing to increased customer loyalty and repeat business.
- Analyzed inventory and sales data using SQL, Alteryx, and Excel to identify purchasing trends, discrepancies, and areas for operational improvement, leading to more efficient stock management and reduced shrinkage.
- Collaborated with cross-functional teams—including sales, operations, and supply chain—to streamline inventory procedures and implement retail best practices across diverse store environments.
- Contributed to inventory forecasting and planning activities, aligning stock levels with customer demand and minimizing excess inventory across multiple retail brands.

HR Reporting Analyst

09/2021 – 09/2022

Aleron inc.

- Drove HR analytics initiatives using Cognos, Avature, Workday, and SuccessFactors, focusing on employee turnover rate, quality of hire, overtime, and billable hours per employee to inform strategic system improvements and decision-making.
- Spearheaded the development of predictive analysis models using complex DAX queries in Power BI, providing external stakeholders with data-driven strategies to optimize billable hours and reduce employee turnover
- Adeptly operated and supported the configuration and data migration of various systems, including SAP Fieldglass, Work Nexus, Workday, and other applicant management software, to create MI reports on absence rate and headcount, enhancing process efficiency and data accuracy.
- Supported end-to-end recruitment for the recruitment team, ensuring the acquisition of top-tier talent.

Business Analyst

09/2018 – 04/2019

Wipro (RAK Bank - Loan Products)

- Produced daily MI reports on credit card portfolio performance, using SQL and VBA automation to track key KPIs such as utilization rates, delinquency trends, and customer acquisition metrics.
- Conducted comprehensive gap analysis on the end-to-end loan origination process, identifying bottlenecks in documentation and sales workflows to drive a 15% reduction in customer inquiry response time.
- Gained exposure to financial products and risk-related reporting, supporting compliance with operational requirements.
- Collaborated with risk, operations, and product teams to optimize credit card workflows and enhance decision-making processes related to approvals, collections, and account management.
- Facilitated stakeholder workshops, documented business requirements, and delivered process improvements that aligned with regulatory and operational objectives.
- Supported CRM system enhancements (Zoho) and applied Agile methodology, improving customer data management and reporting efficiency.

AWARDS

Inspired by Insight Award

Amey Plc (Client: Staffordshire County Council)

- Recognized for delivering insight-led analysis that directly influenced operational decision-making and performance improvements for the Client.

SKILLS

Tools — Avature, Work Nexus, SAP (Fieldglass), SAP (Concur), Workday, Simu8, Power BI, Excel, JIRA, Azure, Copilot, IBM SPSS, Simul8, Azure Databricks, Microsoft Fabric (Data Warehouse, Dataflow Gen2, Notebook), Power Automate, n8n, IFS (AI-scheduling System), and Brightly Confirm (asset management system).

Programming skills — Python (Pandas, scikit-learn, Matplotlib), SQL, T-SQL, DAX, M syntax, JSON Prompting, PySpark and Power query

EDUCATION

Master of Science in Business Analysis and Consulting

09/2022 – 02/2024 | Glasgow, UK

University of Strathclyde

Related coursework: Statistics and Probability, Performance Measurements and Management, Business Analytics, Strategy Modelling and Management, Business Simulation Methods, Fundamentals of Operational Research, Spreadsheet Modelling, Business Operations.

Master's in business management (MBA)

08/2019 – 06/2021

Amity University

Related coursework: Global Marketing, digital marketing, Human resource development, business operations, Managerial economics, Statistics for management, International Business
